FUGRO CONSULTANTS LP

posted 1.27.06

WE ARE RECRUITING FOR THE FOLLOWING OPEN POSITION:

POSITION: EIT/GRADUATE GEOTECHNICAL ENGINEER

LOCATIONS:

Houston, TX	Dallas, TX	Austin, TX
Corpus Christi, TX	Waco, TX	Baton Rouge, LA

COMPANY DESCRIPTION:

Fugro Consultants LP (FCLP) is a subsidiary of the multi-disciplined, publicly-traded Fugro N.V. group of companies with over 8,000 employees in 275 offices operating in 50 countries. FCLP is headquartered in Houston, Texas with 400 employees through 12 offices in the US Gulf Coast. We provide geotechnical engineering consultation worldwide using the network of offices formed by our parent company, Fugro N.V., based in Leidschendam, Holland. With more than $1 billion in total revenue, the Fugro group is a recognized leader in the field of geotechnical engineering.

Fugro is a leader in geotechnical engineering for commercial developments, education facilities, the healthcare industry, industrial plants including power and energy projects, land development including planned communities and single family residences, ports and harbors, public works including water resources, underground tunnels and transportation.

DUTIES/RESPONSIBILITIES:

Engineer will be involved in all aspects of a geotechnical project – preparation of cost estimates and proposals, performing field surveillance and observations including staking boring locations, determining rig access, editing of boring logs and assisting, as-needed, the field services provided by the construction materials engineering and testing (CMET) group. General responsibilities will include preparation of instructions and laboratory assignments, engineering analysis and monitoring of project budget.

Duties will also include application of written communication skills in preparing project notes and draft reports with illustrations and approved CADD drawings. The successful applicant will also arrange and coordinate support services including drafting, word processing, final preparation of the approved report, printing and delivery to client.

REQUIREMENTS:

Bachelor of Science required, Master of Science preferred
Engineer-In-Training License
0-5 years Experience
Valid Passport
