

Staff Geologist/Hydrogeologist

GeoSyntec Consultants, an environmental consulting firm, located in Columbia, MD seeks a qualified staff geologist/hydrogeologist. Qualified applicants must possess the following: BS (MS a plus but not required) in Geology or Hydrogeology, or related field with 0-3 years experience on environmental investigation/remediation projects. Qualifications include: Ability to conduct various field activities (e.g., soil/water sampling and environmental construction oversight) with precision, understanding of field investigation and other environmental fundamentals; strong interpersonal and communications skills; high skill level in using MS Office software; ability to travel; and initiative to manage assignments with direction and training from senior personnel. Familiarity with CADD, GIS, and computer modeling software is a plus but not required. The position will require successful completion of OSHA 40-hour Health and Safety Training. Initial assignments will be various field projects with significant opportunity for professional growth and advancement.

GeoSyntec provides a competitive salary based on education and experience. We also provide an excellent benefit program. GeoSyntec is an Equal Opportunity, Affirmative Action, Equal Access employer. We welcome the application of all qualified males, females, minorities, veterans and the disabled.
